CURRENT & PAST PERFORMANCE

Program Management (Sub Contract)

FBI, Washington DC Metro | Awarded 2018 – Present

Requirements: Provide the personnel, planning, direction, and coordination support necessary to accomplish all work requirements contained in the SOW.

Challenge: Complex projects with various stakeholder involvement, tight deadlines, shifting priorities, constraints, and schedule challenges.

Solution: Transitioned to Agile Scrum methodologies.

Impact: More time to focus on customer value which improved overall quality of deliverables, improved customer engagement, create transparency and trust.

DevOps (Sub Contract)

FBI, Washington DC Metro | Awarded 2018 – Present

Requirements: Scripting/DevOps support to teams for deployment customization scale-up/down resources, load testing and other needs.

Challenge: Developer and Testing teams were waiting on resources, which caused delays with sensitive applications being deployed.

Solution: Implement DevOps cycle.

Impact: Better resource management with improved application development.

Cloud Support (Sub Contract)

FBI, Washington DC Metro | Awarded 2018 – Present

Requirements: Migrate applications to the Cloud.

Challenge: Estimating computing cost, aligning cloud migration strategy with mission objectives and operating systems incompatibility.

Solution: Assess the needs and requirements, provided thorough input, utilized various tools and phased approach to deploy applications into the cloud.

Impact: Migrated applications into hybrid cloud providing higher availability, improved storage and security.

IT - Network Services (Sub Contract)

State Department, Washington DC Metro | Awarded 2018 – Present

Requirements: Maintain and administer computer networks and related computing environments including systems software, application software, hardware and configurations.

Challenge: Legacy equipment near end of life and/or expired software licenses.

Solution: Assess enterprise environment and recommend new hardware and software, provide detailed status reports, design drawings & documents, technical interpretation, site investigation reports, design review, process improvement plans, quality enhancement, configure new devices & tools, submit service & strategic reports.

Impact: Latency reduction & improved network performance.
